

PLANETHACK™

Innovation Driven Tech Development

WHY CHOOSE US

PlanetHack simply has the experience with the most diverse clients, networks, and different size organizations. Since day one, we have remained on the cutting-edge of technology, offering the most advanced applications and hardware possible. It's no wonder that PlanetHack has remained a corner stone and original pioneer in the managed services industry, our drive for the latest advances to offer to our customers to improve work flow.

WELCOME TO OUR WORLD

Most respected ladies and gentlemen It's our pleasure to extend a cheerful welcome to our world **PLANETHACK** the digital giant. We are coming to give u best services according to your business needs. We are giving our best to be with you and help you to reach your business goal. We welcome you with our all. This is our believe that Small cheer and great welcome makes a merry feast.

We are not **Hackers**, In fact, we are **Security Protocols**.

We Believe in **PROFESSIONALISM**

- The professional support services path way
Where PlanetHack provides path way which includes assisting technology involved in virtual programming, coding, Robotic Intelligence, Software program development and training systems with professional educational and carrier vision achieving goals.
- Supporting 24*7 Professional tech networks rounding 365 days.
- Supporting social service virtual platform networks by professional team.
- Professionalism in the hospitality management.

WORK > CODE > PROCESS > SUCCESS > GOAL > REPEAT >

A LITTLE **ABOUT US**

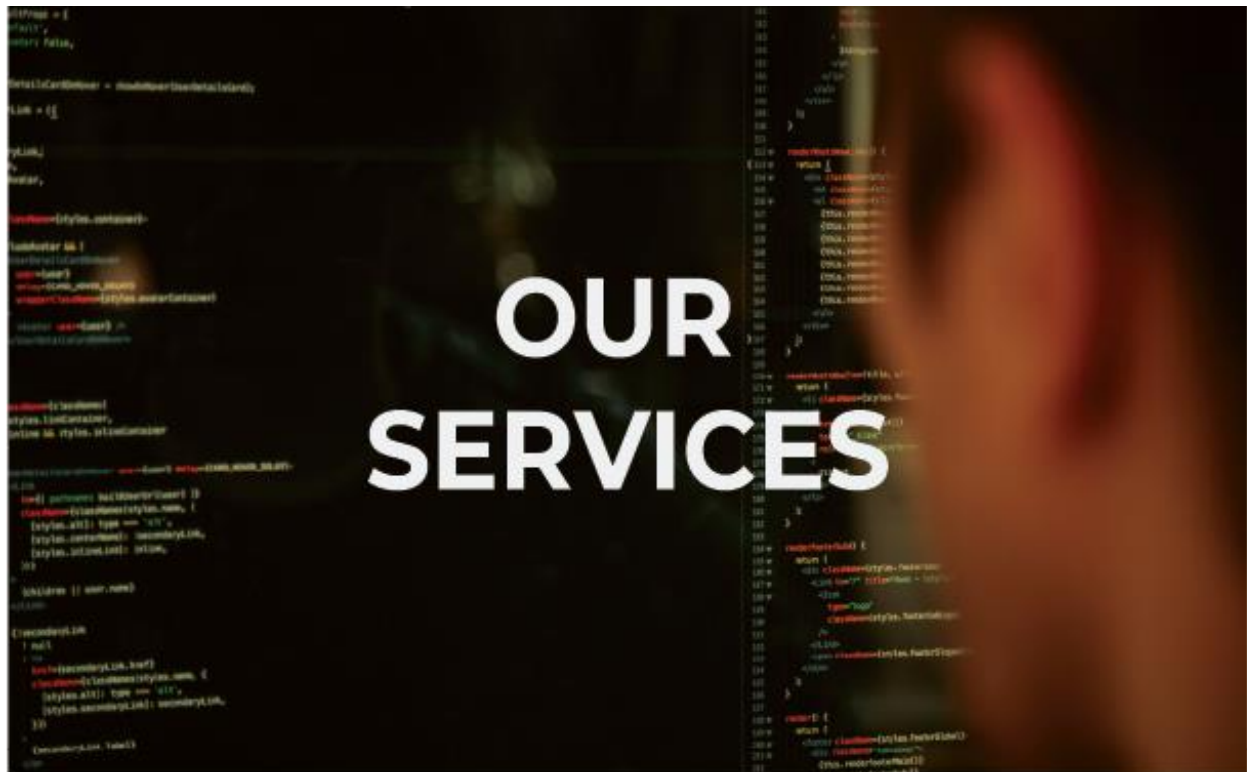

The leading digital giant IT company PlanetHack is a multitasker company. We provide all kind of IT consultancy and solutions all over the world. Our clients are our strength and pride. We ensure their privacy and security. We take the full responsibilities to make a best IT infrastructure. we are there to face any kind of challenges. We provide a full package of IT solutions.

We provide software as per business needs establish good networking system, ensuring security and help them on their branding by digital marketing. There are robotic intelligence system to help them to their office work if the clients want. We are giving the ultimate complete e-business solutions. We are the best choice for corporate companies to make their work easier.

Make technology more user-friendly and useful to all kind of people. We work with the client to make them happy and can fulfil their technical requirements. We are always focusing on client's business needs. We are giving 100% technical support to progress your business strategy. We work with you as your ultimate tech partner so that when you will progress as well as ours will grow with you. We will be given our best to be with you in achieving your business vision and goals.

We are visioning to create a Kingdome of robotics supply chain and provide the best cybersecurity in the world.

OUR SERVICES

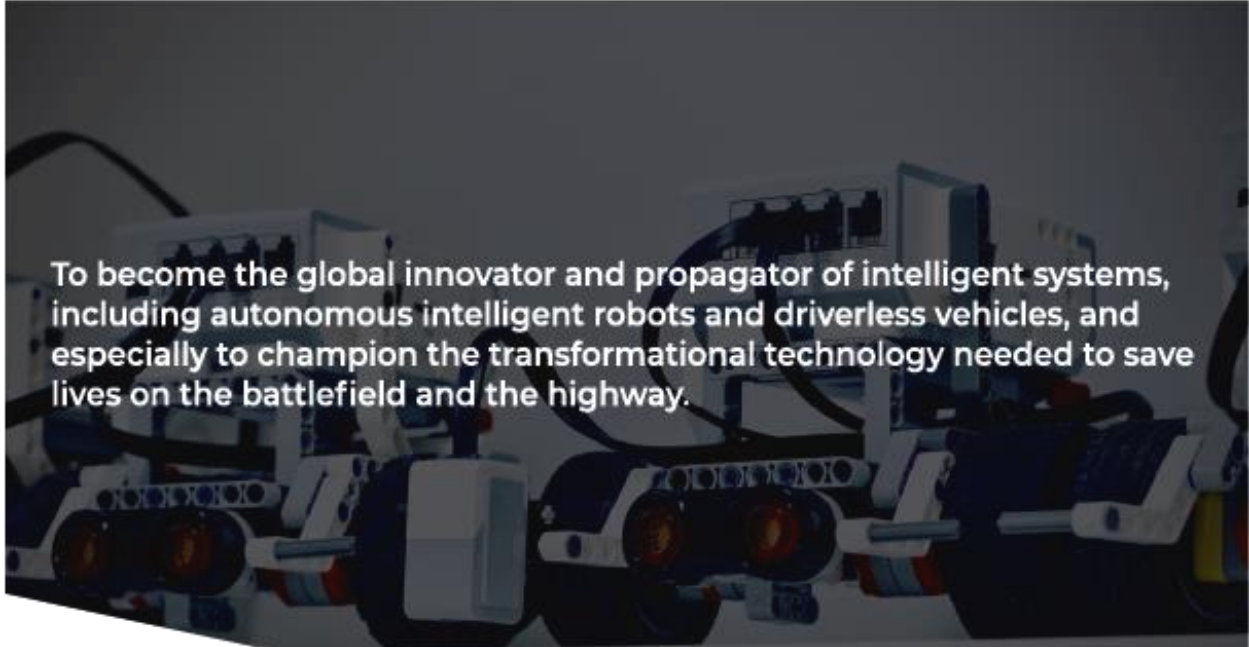

OPERATING SYSTEM DEVELOPMENT

- iOS APP
- Android APP
- Windows APP
- Cross-Platform APP Development

SOFTWARE & APPLICATION DEVELOPMENT

- Custom Software Development
- SharePoint Installation, Migration & Customization
- Machine Learning
- Business Process Automation
- Business Intelligence
- ERP (Enterprise resource planning)

To become the global innovator and propagator of intelligent systems, including autonomous intelligent robots and driverless vehicles, and especially to champion the transformational technology needed to save lives on the battlefield and the highway.

ROBOTICS

- Conceptual, STEM/STEAM Oriented
- Non-modular kits - the ACTUAL STEM
- Analytics on skill sets in various engineering domains
- Automation Systems Development

IT CONSULTANCY

- Consultancy and Advice
- ICT audits and Health checks
- Ongoing Support (Private, Government and NGO project solutions)
- IT Infrastructure
- Virtual IT Director and vCIO

NETWORK SECURITY

Data Connectivity
IP Telephony Solution
Corporate Email
Co-Location & Hosting
Video Conferencing

DESIGN WORKSPACE

● UI/UX Design
● Visual Identity (3D,4D,5D works)
● Illustrations & clip-art
● Multimedia Design
● Affinity Design

DATA SECURITY

- Backup and Recovery
- Data Security Audits
- User access control and privilege management
- Incident management and resolution

WEB SECURITY

- Cross-Site Scripting (XSS)
- Broken Authentication and Session Management
- Insecure Direct Object References.
- Security Misconfiguration.
- Cross-Site Request Forgery (CSRF)

DIGITAL MARKETING

- Affiliate Marketing
- SEO
- Paid Ads
- Email Marketing
- Facebook Marketing
- SMS Marketing
- Youtube Marketing

DOMAIN & HOSTING SELLING

- Domains
- Domain Transfer and Privacy Service
- Hosting (Web and Business)

E BUSINESS SOLUTION

- Mobile E-Commerce App Development
- Custom E-Commerce
- Social Media Marketing

CONCEPT WEB

- Web Template
- Web Services Description Language (WSDL)
- XML Interface for Network Services (XINS)
- Functional and non-functional testing

Industrial Units
Simulation/Calculation/Process software

The screenshot displays the Planethack software interface. On the left, a data table shows 'Grinding Ore' properties:

Property	Value	Unit
Moisture	21.7	%
Volume/tonne	7.22033	m ³ /ton
Density	1.57021	ton/m ³

Below this, a 'Component grade particle size distribution' table is shown:

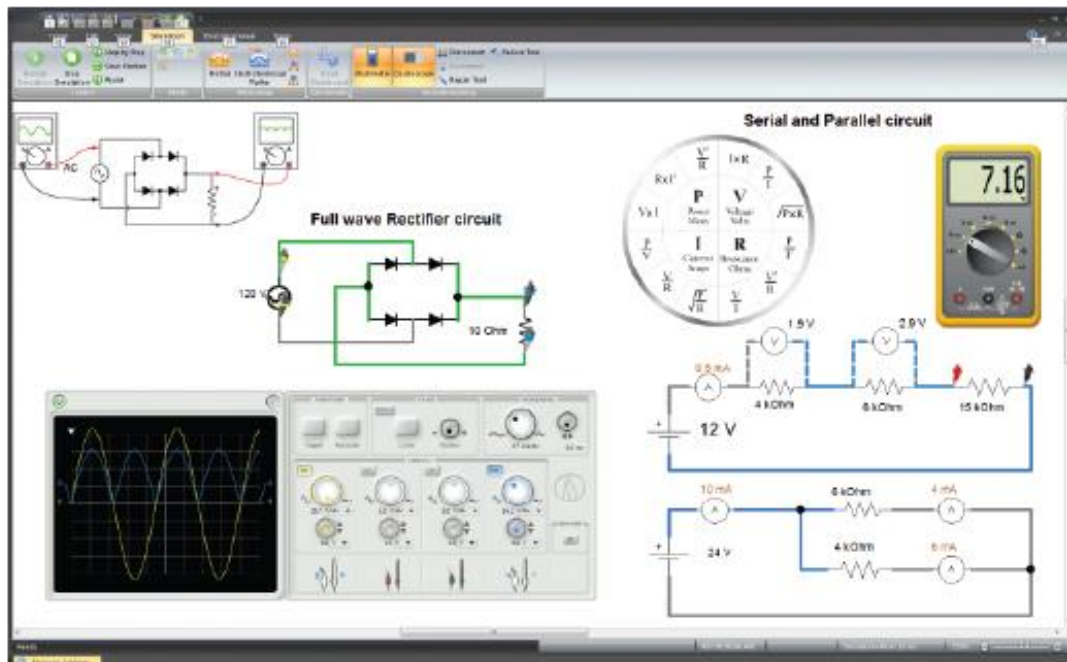

Size classes	% Individual	% Passing	% Retained
20000 µm	8.82	100	0
10000 µm	21.12	90.00	9.92
5000 µm	24.82		
4000 µm	15.34		
3000 µm	15.92		
1000 µm	7.58		
500 µm	6.76		
250 µm	3.58		
125 µm	2.84		
64 µm	2.5		
32 µm	1.88		
16 µm	1.16		
8 µm	2.56		

On the right, a 'preliminary Design of a Grinding Circuit' diagram shows a flow from 'Fresh Feed' through a 'Feeder' to a 'Rod mill water regulation' unit, then to a 'Rod mill', followed by 'Hydrocyclone water regulation' and 'Hydrocyclone' units, and finally 'To further processing'. A 'Parameters of Equipment #1 - Rod mill - Rod Mill (1)' dialog box is open, showing:

Parameters	Values	Unit
Number of mills in parallel	1	
Inside mill diameter	2	m
Length/diameter ratio	1.6	
Percent volumetric loading of rods	35	%
Fraction of critical speed	0.7	
Rod specific gravity	7.8	ton/m ³
Wald index per component	0.6	

Automation Industry

Artificial Intelligence

The development of AI started with the intention of making similar intelligence in machines that we find and respect high in humans.

Our Goals of AI:

To Create Expert Systems - The systems which exhibit intelligent behavior, learn, demonstrate, explain, and advice its users.

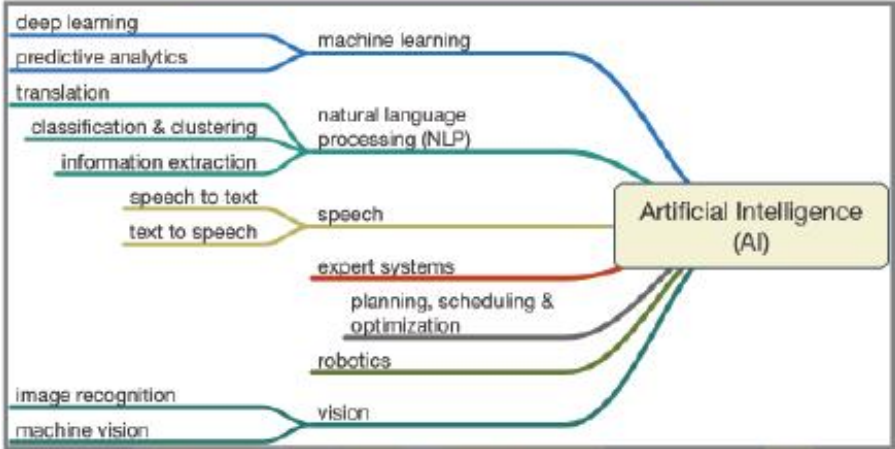

To Implement Human Intelligence in Machines - Creating systems that understand, think, learn, and behave like humans

Our Areas of AI:

- Gaming.
- Natural Language Processing.
- Expert Systems.
- Vision Systems.
- Speech Recognition.
- Handwriting Recognition.
- Intelligent Robots. and many more...
